I put men back to work, smooth out the rough places on road to recovery and allay social unrest. Some people have been advocating them for a long time and for their pains, have been denounced as radicals, visincrees and impractical theorists. Now there is every indi-tion that most of these jobs will be done, not because the intry is wholly sold on them in theory, but because any

is good enough to hit the depression with. First of all, there is the matter of city slums. For years social workers and others have been telling that had housing is cancer in municipal life. They proved her case over and over again, but we never did anything that it. Now it is evident that hundreds of millions are

o be spent on slum clearance plans—not because we have it last awakened to the menace of the slum, but because we see that this is a good way to start money circulating and give m jobs.

Then there is the much talked-of plan by which industry dithe government would join forces to check over-producshops and adopt minimum wage scales. Social reformers have trumpeted the need of these steps for years. Intelligent bus-iness men have urged them, labor leaders have dreamed of

There is, also, Muscle Shoals. Ever since the war a handful of men has tried to make it the basis for a great govier mental experiment in power production—a laboratory in which some profoundly important theories about industry, agriculture and public utility management could be tested.

This experiment is at last to be made—because of the depression on a huge scale is being attempted because

## Peggy Tells Her Story

THEN little Peggy McMath returned to school the other day, after the conclusion of her kidnaping experience, that it was something of an effort, here was a neat little demonstration of the operation of a hit of child psychology.

The teachers, quite properly, asked the other children not to talk to her about the kidnaping, so that the youngster children promised—but as soon as recess time came all promises were forgotten.

Ing his mother had said to him when there was no one firmly, "You've simply got to pour confidence into that poor nervous child, son. She's splendid but she had a shock and it is our duty to see her through this bad time."

Then there is the much talked-of plan by which industry dithe government would join forces to check over-producshops and adopt minimum wage scales. Social reformers have trumpeted the need of these steps for years. Intelligent bus-iness men have urged them, labor leaders have dreamed of
